Instructions

Overview

Generate feeds for any product search engine or marketplace, e.g. Google Shopping, Facebook, Pinterest, PriceGrabber, BizRate,
DealTime, mySimon, Shopping.com, Yahoo! Shopping, PriceRunner.
Simply configure the feeds and run the script to generate them from your product database. Highly flexible system and easy to modify.

Version 6

Updated and refractored for Phoenixcart by @raiwa

Released under commercial License

original author Lech Madrzyk

Compatibility:

Phoenix Cart 1.0.8.6.+.
Tested with Phoenix 1.0.8.20
PHP 7.0-8.0

Requires:

curl with ftp and sftp protocols

Installation

1. Copy the new files from "upload" into the appropriate folders.
No files will be overwritten.

2. Go to: Admin: Tools: Feedmachine
Click on the "Install/Update Feedmachine configurations and database table"

Configuration

1. You can find the configuration settings under: Admin: Configuration: Feedmachine
Configuration settings should not be needed to be changed in a normal store setup.

2. Open the sample configuration file: admin/feedmachine/fm-feed-configs/google_base.php

This is quite a basic feed configuration and can be used to learn how to configure new feeds.

This should produce a valid Google Product Search feed, however you might require one that
is more sophistcated, in which case you should search "Feedmachine Configuration"
in the Phoenix Add-ons section (https://phoenixcart.org/forum/addons/)
or contact me for customized configurations:
raiwa@phoenixcartaddons.com
www.phoenixcartaddons.com

3. Open the file: admin/feedmachine/feedmachine_loadingbay.php

Modify the categories mapping function for your shop categories

Check the following google categories taxonomy resource:
https://support.google.com/merchants/answer/6324436?hl=en&sjid=16635037559001871930-EU
Download Google taxonomy spreadsheet:
https://www.google.com/basepages/producttype/taxonomy-with-ids.en-US.xls
Note: Google categories should be entered here in ID Numbers rather than names, so they can serve independant of the language.

4. Go to: Admin: Tools: Feedmachine

Enter the configuration settings and credentials for your Goole shopping or other accounts.
FTP- Port is only required for SFTP.
You can find your Google credentials for ftp and sftp in your Google Merchant Center: Tools and Configuration: SFTP/FTP/GCS
Note that Google FTP upload will be removed on September 15th 2023.

That's it!

Update

Change log:

6.0 versus previous versions
- refractored and updated for Phoenixcart 1.0.8.6.+
- changed ftp uploads to curl
- added support for sftp
- moved actions to action modules
- moved configuration settings to database configuration entries
- added install and uninstall scripts

Update from previous versions

1. remove all existing feedmachine files except your configurations in: admin/fm-feed-configs/

2. Copy the new files from "upload" into the appropriate folders.

3. Move/copy your configurations from: admin/fm-feed-configs/ to: admin/feedmachine/fm-feed-configs/

4. delete the old configuration directory: admin/fm-feed-configs/

5. Go to: Admin: Tools: Feedmachine
Click on the "Install/Update Feedmachine configurations and database table"

That's it!

Commercial License

Commercial Add-On/Theme License

1. The License grants you, the purchaser, an ongoing, non-exclusive, worldwide license to make use of the digital work (Add-On) you have purchased. Read the rest of this license for the details that apply to your use of the Add-On.

2. You are licensed to use the purchased Add-On for one single End Product (OsCommerce Store) for yourself or for one client. Things you can do with the purchased Add-On/Theme

3. You can create one End Product (OsCommerce Store) for a client. This license is then transferred to your client.

4. You can modify or manipulate the purchased Add-On. You can combine the purchased Add-On with other works and make a derivative work from it. The resulting derivate work can be used only for one client (store). The resulting works are subject to the terms of this license. Things you can't do with the purchased Add-On/Theme.

5. You can't Sell the End Product, except to one client. (If you or your client want to Sell the End Product, please contact oscaddons.com for an Extended License.)

6. You can't re-distribute the purchased Add-On as stock, in a tool or template, or with source files. You can't do this with an purchased Add-On either on its own or bundled with other items, and even if you modify the purchased Add-On. You can't re-distribute or make available the purchased Add-On as-is or with any modifications. These things are not allowed even if the re-distribution is for Free. For

example: You can’t purchase an Add-On, and sell or give it to more than one client. You can’t license an item and then make it available as-is on your website for your users to download.

7. Although you can modify the Item and therefore delete unwanted components before creating your single End Product, you can’t extract and use a single component of an Item on a stand-alone basis. For example: You license a website theme containing icons. You can delete unwanted icons from the theme. But you can't extract an icon to use outside of the theme.

8. You must not permit an end user of the End Product to extract the Item and use it separately from the End Product.

9. You can’t use an Item in a logo, trademark, or service mark.
